the university of oxford was the setting for the workshop where the papers in this book were first presented authors from around the world have contributed papers covering theory practical applications and commercial products with particular emphasis on vlsi implementations and applications they put hardware accelerators in their correct context alongside emerging software algorithms which also claim useful speed advantages forthcoming commercial developments and research work are presented by the leaders in the field

since its invention in the 1920s particle accelerators have made tremendous progress in accelerator science technology and applications however the fundamental acceleration principle namely to apply an external radiofrequency rf electric field to accelerate charged particles remains unchanged as this method either room temperature rf or superconducting rf is approaching its intrinsic limitation in acceleration gradient measured in mev/m it becomes apparent that new methods with much higher acceleration gradient measured in gev/m must be found for future very high energy accelerators as well as future compact table top or room size accelerators this volume introduces a number of advanced accelerator concepts and their principles technologies and potential applications for the time being none of them stands out as a definitive direction in which to go but these novel ideas are in hot pursuit and look promising furthermore some andac requires a high power laser system this has the implication of bringing two different communities accelerator and laser to join forces and work together it will have profound impact on the future of our field also included are two special articles one on particle accelerators in china which gives a comprehensive overview of the rapidly growing accelerator community in china the other features the person of the issue who was well known nuclear physicist jerome lewis duggan a pioneer and founder of a huge community of industrial and medical accelerators in the us

this book contains nearly a complete collection of papers presented at the
