this book provides a unified account of the connection between justice and the good life it argues that the virtues of character require institutions while good institutions enable persons to live together virtuously although virtue ethics and political philosophy are rich and sophisticated philosophical traditions there has been an unfortunate divergence in theory and practice between the virtues of character and the virtues of institutions this book has two primary purposes first it reorients political philosophy around the concept of the good life to do so the author addresses the problem of political authority from a virtue ethics perspective he also considers whether a political theory oriented around the

good life is compatible with Rawls's notion of reasonable pluralism. Second, the book explains the relationship between the virtues of institutions and the virtues of character. The author shows how institutions support the development and exercise of the virtues of character while examining specific other regarding virtues such as justice and friendship. The authority of virtue will appeal to scholars and advanced students working in virtue ethics, social and political philosophy, ancient philosophy and political theory.

This book reassesses the academic field of political theory and brings into sharp relief its problems and opportunities. Here for the first time diverse theorists coordinate their arguments through a common focus. This focus is the writing of John G. Gunnell. Gunnell attacks a set of myths said to plague almost every recent theory about politics: the myth of the given, the myth of science, the myths of theory, the myth of tradition and the myth of the political. He argues that these all alienate political theory from substantive inquiry and actual practice. Contributors include Richard E. Flathman, Russell L. Hanson, George K. Kateb, Paul F. Kress, J. Donald Moon, John S. Nelson, J. G. A. Pocock, Herbert G. Reid, Ira L. Strauber, Nathan Tarcov and Sheldon S. Wolin. They respond on behalf of projects in the new history of political theory: epic theory, phenomenology, traditional theory and political deconstruction. These discussions also address the theories of Hans Georg Gadamer, Jürgen Habermas, Karl Marx, Leo Strauss, Alain Touraine and Ludwig Wittgenstein. At the conclusion of the volume, Gunnell reconsiders his arguments in light of the respondent's remarks. His challenges thus provide a series of confrontations both exciting and provocative among major theorists. The result is a lively debate about what political theory is, how it relates to political history and practice, and how it involves epistemology. The authors probe a broad range of questions about practices of politics and traditions of discourse and they identify priorities for the future of the field.
